FILTRATION & SEPARATION 1991 INDEX

Volume 28 Index

January/February 1-72 March/April 73-136 May/June 137-216
July/August 217-296 September/October 297-368 November/December 369-440

Acid gas treatment. Gas Filtration Elements Capable of Withstanding Extreme Temperatures and Corrosion 162
Air filtration. To Have One's (Filter) Cake and... 391
Backwashing. Examining the Backwashing of Rapid Granular Media Filters 38
Bacterial cultures. Solving Pollution Problems Through Biotechnology 243
Biomass and biofluids. Microfiltration of Biomass and Biofluids: Effects of Membrane Morphology and Operating Conditions 332
Biotechnology. Solving Pollution Problems Through Biotechnology 243
BOD reduction. Deep Bed Filtration Provides Triple Functionality 241
Capillary filtration. Change to Capillary Filtration and Never Change a Filter Cloth Again 238
Cell cultures. Development of Membranes Formed from Cell Cultures 45
Centrifuge designs. Design Fundamentals of Centrifuges 381
Centrifuges (decanter). Decanter and Disc-stack Centrifuges 387
Centrifuges (disc-stack). Decanter and Disc-stack Centrifuges 387
Centrifuges (disc-stack). Enhanced Separation with Rough Disc Upper Surfaces 50
Ceramic filter (discs). Change to Capillary Filtration and Never Change a Filter Cloth Again 238
Ceramic filter elements. Gas Filtration Elements Capable of Withstanding Extreme Temperatures and Corrosion 162
Ceramic filter elements. Practical Application of High Temperature Filters 231
Coal hydrophobicity. Coal Hydrophobicity and its Role in Filtration and Dewatering 351
Coalescing filters (compressed air). Coalescing Filters — Reduced Operating Costs and Greatly Extended Service Life 158
Compressed air filtration. Coalescing Filters Reduced Operating Costs and Greatly Extended Service Life 158
Compressed air filtration. Necessary Protection for Sensitive Separation Equipment 153
Compressed air filtration. Removing Condensed Oil — Water Emulsion From Air Purification Systems 160
Condensate drains. Removing Condensed Oil — Water Emulsion From Air Purification Systems 160
Crossflow filtration. Crossflow Filtration of Seawater 117
Crossflow microfiltration. Application of Pulsating Cleaning Technique in Crossflow Microfiltration 199
Cyclone performance: An Experimental Investigation Elucidating the Nature of the Effect of Solids Loading on Cyclone Performance 188
Deep bed filtration. Deep Bed Filtration Provides Triple Functionality 241
Denitrification. Deep Bed Filtration Provides Triple Functionality 241
Depth filter. Self-cleaning Depth Filter Uses Twisted Fibrous Elements to Improve Filtration Performance 237
Desalinators. Manual Reverse Osmosis Desalinator Technology 230
Dewatering (sludge). Dewatering Co-settled Primary Humus Sludge 145
Dewatering Change to Capillary Filtration and Never Change a Filter Cloth Again 238
Dewatering. Coal Hydrophobicity and its Role in Filtration and Dewatering 351
Dewatering. Dewatering, Fine Screening and Compaction of Waste Solids Available in a Single Unit 150
Dewatering. Experimental Modelling of Mechanical Peat Dewatering 415
Expert systems. Expert Systems Control of Fabric Filters 275
Expert systems. Solid/Liquid Separation Equipment Simulation and Design — an Expert systems Approach 268
Fabric dust filters. Pulse-jet Driven Injectors for Fabric Dust Filters: (Part 1) The Significance of Jet-Injector Interaction 341
Fabric dust filters. Pulse-jet Injectors for Fabric Dust Filters: (Part 2) The Fine Structure of the Overpressure Pulse 420
Fabric filters. Expert Systems Control of Fabric filters 275
Fibrous filter elements. Self-cleaning Depth Filter Uses Twisted Fibrous Elements to Improve Filtration Performance 237
Filter beds (multilayer). Optimisation of Multilayer Filter beds 33
Filter cake. To Have One's (Filter) Cake and... 391
Flux decline. Experimental Analysis of Flux decline Mechanism of Batch Ultrafiltration (Filtration Characteristics of Gel Layer) 104
Gas filtration (high temperature). Practical Application of High Temperature Filters 231
Gas filtration (high temperature). Gas Filtration Elements Capable of Withstanding Extreme Temperatures and Corrosion 162
Gas separation. Necessary Protection for Sensitive Separation Equipment 153
Granular filters. Examining the Backwashing of Rapid Granular Media Filters 38
Horizontal vacuum belt filters. Horizontal Vacuum Belt Filters in the Mining and Chemical Industries 121
Hydraulic fluid filtration. Tell-Tale Pressure Filters Provide Protection for Simulation Equipment 311
Hydraulic fluid filtration. More Haste Less Speed 315
Membrane filtration. Membrane Filtration for the Recycling of Water-based Synthetic Metalworking Fluids 407
Membrane morphology. Microfiltration of Biomass and Biofluids: Effects of Membrane Morphology and Operating Conditions 332
Membrane press technology. Improving Sewage Sludge Treatment with Membrane Press Technology 146
Membrane separation processes. Membrane Separation Processes in Pulp and paper Production 42
Membranes (anisotropic polymer). Microporous Anisotropic Polymer Membrane Technology 228
Membranes (chemically resistant). Chemically Resistant Ultrafiltration Membranes 225
Membranes (controlled hydrophobicity). Chemically

Resistant Ultrafiltration Membranes 225
Membranes (fouling and cleaning). 21
Membranes (nitrocellulose). Internally Supported Nitrocellulose Membranes 225
Membranes (porous aluminium) Porous Aluminium Membrane Technology 226
Membranes (ultrafiltration). Chemically Resistant Ultrafiltration Membranes 225
Membranes. (ultrafiltration). Selectivity of Ultrafiltration Membranes — Influence of Fouling and Cleaning Conditions 21
Membranes. Development of Membranes Formed from Cell Cultures 45
Microfiltration. Microfiltration of Biomass and Biofluids: Effects of Membrane morphology and Operating Conditions 332
Modelling: Experimental Modelling of Mechanical Peat Dewatering 415
Oil spill recovery. Versatile Oil Spill Recovery Unit 234
Oil/Water separation. Versatile Oil Spill Recovery Unit 234
Overpressure pulse. Pulse-jet Injectors for Fabric Dust Filters: (Part 2) The Fine Structure of the Overpressure Pulse 420
Peat dewatering (mechanical). Experimental Modelling of Mechanical Peat Dewatering 415
Pleating filtration paper. Pleat, Repeat Filter Elements are Complete 143
Pollution control. Versatile Oil Spill Recovery Unit 234
Pollution control. Solving Pollution Problems Through Biotechnology 243
Pressure-swing adsorption. Necessary Protection for Sensitive Separation Equipment 153
Pulp and paper production. Membrane Separation Processes in Pulp and Paper Production 42
Pulsating cleaning technique. Application of Pulsating Cleaning Technique in Crossflow Microfiltration 199
Pulse-jet driven injectors. Pulse-jet Driven Injectors for Fabric Dust Filters: (Part 1) The Significance of Jet-injector Interaction 341
Pulse-jet filters. The Role of Venturis in Pulse-jet filters 24
Pulse-jet injectors. Pulse-jet Injectors for Fabric Dust Filters: (Part 2) The Fine Structure of the Overpressure Pulse 420
Recycling. Membrane filtration for the Recycling of Water-based Synthetic Metalworking Fluids 407
Reverse osmosis. Manual Reverse Osmosis Desalinator Technology 230
Screening. Dewatering, fine Screening and Compaction of Waste Solids Available in a Single Unit 150
Sewage sludge treatment. Improving Sewage Sludge Treatment with Membrane Press Technology 146
Simulation and design. Solid/Liquid Separation Equipment Simulation and Design — an Expert Systems Approach 268
Solid/Liquid separation. Solid/Liquid Separation Equipment Simulation and Design — an Expert Systems Approach 268
Solids compaction. Dewatering, Fine Screening and Compaction of Waste Solids Available in a Single Unit 145
Solids filtration. Deep Bed Filtration Provides Triple Functionality 241
Solids loading. An Experimental Investigation Elucidating the Nature of the Effect of Solids loading on Cyclone Performance 188
Synthetic metalworking fluids. Membrane Filtration for the Recycling of Water-based Synthetic Metalworking Fluids 407
Thickener design. Theory and Application of Thickener design 110
Ultrafiltration (batch). Experimental Analysis of Flux Decline Mechanism of Batch Ultrafiltration (Filtration Characteristics of Gel Layer) 104
Ultrafiltration. Selectivity of Ultrafiltration Membranes — Influence of Fouling and Cleaning Conditions 21
Ultrafiltration. Ultrafiltration as a Nonpolluting Alternative to Traditional Clarification in Water Treatment 194
Vacuum belt filters. Horizontal Vacuum Belt Filters in the Mining and Chemical Industries 121
Venturis. The Role of Venturis in Pulse-jet Filters 24
Water treatment. Ultrafiltration as a Nonpolluting Alternative to Traditional Clarification in Water Treatment 194
